READ BEFORE YOU PLAY

The story

A snowstorm scrambled the memory of the sleigh's launch computer, and now the sleigh won't take off. Luckily, Juniper, the Chief Sleigh Engineer, hid a backup copy of the 10-letter launch code inside 10 puzzles around the workshop. Your players are the new elf crew. Each puzzle they solve gives them one letter of the code. When all 10 letters are on the Launch Panel, they say the code to you and the sleigh is ready to fly.

Who it's for

Families and groups, ages 8 and up. Kids 6–7 can play on a team with an older helper. Plan on 60–90 minutes. Play as one big team or race two teams (print one set per team).

What you need

- This file, printed (pages 4–19; one set per team)
- 12 envelopes (or folders) and tape
- Pencils; scissors for the host
- A small treat or a gift to "launch" at the end
- Optional: a timer, a small mirror (puzzle 10), and a box that closes as the "sleigh"

Printing

Print at "Actual size". Color is best (puzzles 6 and 7 use colors), but black and white also works.

Set-up (about 20 minutes).

1. Cut out the envelope labels (page 17) and stick one on each envelope.
2. Put each puzzle page (pages 6–15) in the envelope with its number. Put the Launch Panel (page 5) in the START envelope.
3. Hide envelopes 1–10 around the room or the house. Keep the START envelope and the story card (page 4) with you.
4. Cut out the hint cards (page 16) and keep them in your pocket.
5. Put the treat or gift in the "sleigh" with the FINALE half of the story card.
6. Optional: hang the door sign (page 19) and hand out the elf badges (page 18).

Host guide

How to play

1. Gather the crew, hand out elf badges and read Juniper's message aloud (page 4, top half).
2. Hand over the START envelope and say "Go!" Start a 60-minute timer if you like.
3. Players find the envelopes and solve the puzzles in any order. Each puzzle tells them which letter of the code they found (letter 1, letter 2 and so on).
4. They write each letter in its box on the Launch Panel.
5. When all 10 boxes are full, they read the code to you. If it's right, they open the sleigh and you read the FINALE.

Teams

Racing two teams? Give each team its own printed set and hide the envelopes in two different rooms. First team to launch wins.

Hints

Every puzzle has a hint card. A good rule: a team can ask for a hint after 5 minutes on one puzzle, or trade a hint for a silly task (sing a line of a carol, do 10 reindeer jumps).

Making it easier

- Don't hide the envelopes; lay them out on the table.
- Tell younger players the code is a word for something cold that falls from the sky.
- Work through puzzles 2 and 5 together, out loud.

Making it harder

- Set a 45-minute timer.
- Hide envelopes inside each other: envelope 2 is only found after solving 1, and so on.
- No hint cards, or only three for the whole game.

Answers are on pages 20–21. Keep those pages (and the hint cards) away from the players. Each puzzle can also be checked on its own: its letter goes in the box at the bottom of the puzzle page.

HOST READS ALOUD · CUT IN HALF

READ FIRST

Attention, new elf crew!

This is Juniper, Chief Sleigh Engineer. Last night's snowstorm scrambled the sleigh's launch computer, and it has forgotten its 10-letter launch code. No code, no take-off, and Christmas Eve is coming fast!

I hid a backup of the code in 10 puzzles around the workshop. Each one gives you one letter. Solve them in any order, write each letter on the Launch Panel, and tell me the code. I'm counting on you.

Warm mittens and good luck,
Juniper

READ AT THE END

Launch code accepted: **SNOWFLAKES**! The lights are blinking, the bells are jingling, and the sleigh is ready to fly.

I picked that code for a reason. No two snowflakes are the same, and no two elves are either. Each of you solved something the others couldn't, and together you saved Christmas Eve. Please enjoy your reward from the sleigh.

With thanks from the whole workshop,
Juniper

5

PUZZLE 5 OF 10 · DETECTIVE

Who Opened the Gate?

Someone left the reindeer gate open, and the reindeer wandered off to play in the snow! It must have been the elf whose job is feeding the reindeer. Four elves each have one job. Who feeds the reindeer?

Fern

Milo

Pip

Ruby

1. The elf who wraps the presents has a name that starts with R.
2. Milo doesn't work with animals, and he never touches paint.
3. Pip sneezes around reindeer, so Pip never goes near the stable.

	Wrapping	Baking	Painting	Reindeer
Fern				
Milo				
Pip				
Ruby				

How to use the grid: put × for "no" and ✓ for "yes". Each elf has exactly one job, and each job belongs to exactly one elf. When a row or column has three ×, the last square must be ✓.

The reindeer feeder is: _____

Letter 5 of the launch code. It's the first letter of that elf's name. Write it in box 5.

Number of differences I found: _____ × 2 = _____

ELF NUMBER CODE

A 1	**B** 2	**C** 3	**D** 4	**E** 5	**F** 6	**G** 7	**H** 8	**I** 9	**J** 10	**K** 11	**L** 12	**M** 13

PUZZLE 7 OF 10 · LOGIC

Toy Shelf Grid

The toy elves stock their shelves in a very exact way. Every row, every column and every 2×2 box must have one tree, one star, one bell and one gift.

Draw the missing pictures (a quick sketch is fine). Which picture goes in the **shaded** square?

Each picture is a letter:

Letter 7 of the launch code. The shaded square's letter goes in box 7.

Hint cards

HOST KEEPS · CUT OUT

Hint 1: Cookie Count

Three gifts make 18, so one gift is 6. Use the gift to find the bell, then the bell to find the star.

Hint 2: Elf Radio

Count 3 letters back on the alphabet strip for each letter. O becomes L and H becomes E.

Hint 3: The Snowy Forest

Try the maze backwards: start at the SLEIGH and work toward START.

Hint 4: Mixed-Up Workshop

The first word hangs on the front door and starts with W.

Hint 5: Who Opened the Gate?

Clue 1 tells you Ruby wraps. Then Milo can only be baking. Who is left for painting?

Hint 6: Spot the Difference

Check the sky, the snowman's scarf, the colors of the gifts and the snow on the ground. There are 6.

Hint 7: Toy Shelf Grid

Look at the shaded square. Its row already has a bell, its column has a star, and its 2×2 box has a gift. What's left?

Hint 8: What Comes Next?

Row A counts up by 5. In row B each number doubles. Row C counts down by 5.

Hint 9: Workshop Word Search

Cross out each word's letters lightly. The leftover letters start with L-E-T-T-E-R.

Hint 10: The Frosty Window

The first word is THE. Read the letters from right to left if you have no mirror.

6 = L 6 differences: the moon, one snowflake and the candy cane are missing; the snowman's scarf is green; the left gift is gold; a mitten is lying in the snow. 6 × 2 = 12, and 12 = L.

7 = A The shaded square (row 3, column 2) is the tree, and tree = A.

8 = K A = 20, B = 16, C = 25. 20 + 16 - 25 = 11, and 11 = K.

9 = E The leftover (pink) letters read LETTER NINE IS E.
